

## Aerolace<sup>®</sup>

Activated Carbon Filter Media  
for gas phase filtration

### HIGH EFFICIENCY LOW PRESSURE DROP

Aerolace media can be loaded with various functional granules for different application requirements. Commonly used granules include activated carbon, ion-exchange resin, potassium permanganate, and zeolite.

Due to its highly homogeneous structure and particle distribution, Aerolace media can deliver high gas removal efficiency while maintaining low pressure drop.

### APPLICATIONS

- HVAC Filter
- Indoor Air Quality Filter
- Automotive Cabin Filter
- Respirator / Mask
